B Secrets

Children sometimes have secrets, teenagers and grown-ups too.

There are so many different secrets, and so many ways of treating them. Some people treat other people's secrets with respect.

There are also different opinions about secrets. What some people consider a secret, others don't.

You can use the text below and the pictures for inspiration.

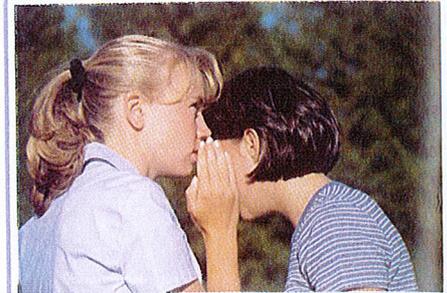

"If you reveal your secrets to the wind you should not blame the wind for revealing them to the trees." ~ *Kahlil Gibran*

"The man who can keep a secret may be wise, but he is not half as wise as the man with no secrets to keep" ~ *Edgar Watson*

"If we knew each other's secrets, what comfort we would find." ~ *John Churton Collins*

Essay title: **Secrets**

2. Write a story about someone's secret. The story can be true or imaginary

Essay title: **The secret**

SECRET

C Recycling

What is Recycling?

Recycling refers to the process of collecting used materials which is usually considered “waste” and reprocessing them. Recycling means using the core elements of an old product as raw material to manufacture new goods. Some of the most common items that are recycled are plastic, glass, paper, batteries, aluminum etc.

Process of Recycling

The recycling process involves three stages.

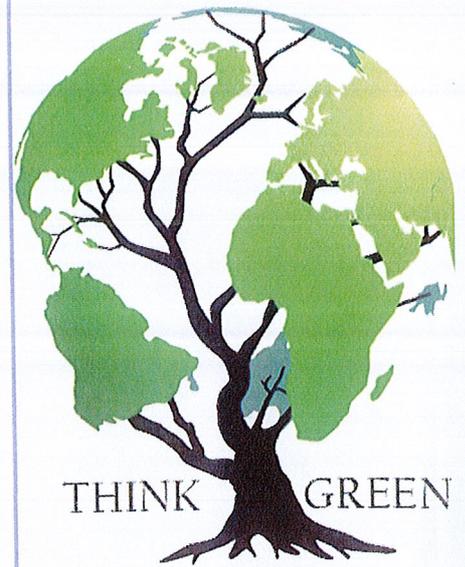

In the first stage the old products are collected and processed, where they are sorted, cleaned and made ready for recycling or manufacturing new products.

The second stage involves the manufacturing of new products from the raw material obtained by the processing of the old products.

Finally, the process ends with the purchasing of recycled goods by the consumers.

Statements about recycling:

- Recycling saves energy.
- Recycling saves environmental conditions and reduces pollution
- Recycling saves natural resources
- Economic benefits
- Recycling saves space for waste disposal
